CD194:9-10- this would make more sense to me not as the real LHO but as a possible False Oswald (where I have filed these pages. If and when you get more from Renner, there is someone I can ask about this guy. Because what the speech above is taken to mean is not so, I cannot ask the office. They'd just not reply. But there is someone outside it I may be able to get something from. If they have a file on him/ I am not certain of this NOPSI station referred to, but I think it is below (or in NO, uptown from) the LHO address and places he was reported. I do not believe from what we know about him he'd have been there.
